. . . This program can be used to record video screen capture for research, teaching and training. Most users have encountered the situation where they have lost important windows screens in the course of the day or while working on a project. In this case, it is always a good idea to find a solution to save the important screens so that you can view them later or so that you can share them with someone else. Screen Recorder allows you to save a complete screen capture for later use, with or without the source video file. You can choose to save the capture to any of your hard drive locations, including your desktop, a network location, a memory card, or even a removable device such as a USB flash drive. You can save a screen capture or a video in high-quality MP4 format (with or without sound). Simply choose the files that you want to save as screen captures. Once you have captured a screen, you can view them on any other computer that has Flash Player installed. You can also share the screen capture with other computers or e-mail it to someone.
